Patient	00:05 - 00:32	My name is Krystal and I'm 35 years old. I'm having derma filler to reduce the dark circles under my eyes, I got bags under there now. I'm hoping to look fresh face afterwards. They always make you feel nice and welcome. Um, and any question, they always answer really thoroughly, so I'm absolutely fine, not nervous. I would always make sure that I've done my research and I go to Dr. Leah because I know that she's a well medical-trained doctor and I won't just let anyone, anyone, touch my face.
Dr. Leah Totton	00:33 - 00:51	Today, we're performing some tear trough dermal filler. So this is filler, which is placed in the under eye area. And the purpose of that is to improve the appearance of deep troughs in that area, and it also will help to improve dark circles under the eye.
Dr. Leah Totton	00:52 - 01:25	When I perform dermal filler under the eye [with] tear trough dermal filler, I perform it using a cannula. This is a small tube, which means that there actually is no needle being used in that area, it's a very delicate area of the face. So the treatment itself is fairly straightforward because we're not actually using a needle at all. There should be little or no down time, and it is something that gives instant results. At Dr. Leah clinics, we do everything possible to minimize your risks with any procedure that we perform.
Patient	01:26 - 01:53	I've just had the treatment done and it was quick, easy. I would definitely recommend this treatment to other people, anyone that's got the same as me, the dark circles, tired-looking eyes, bags. It's such a good treatment, I've got no bruising or swelling or anything like that. This is the best place to come, Dr. Leah clinic. I would definitely be returning. There's been, there's no down time with this procedure. I can literally go straight back to work. Everyone will be looking and thinking I look a lot fresher but they won't actually know what it is that I've had done.

Kind Regards,

Thao
